RE: WT Docket No. 24-240, RM-11989
To the Federal Communications Commission:

As an Amateur radio operator, I oppose NextNav's petition to reconfigure the 902-928 MHz band.
We have worked around other users of Part 15 devices in the spirit of working with others.

NextNav’s petition seeks that they take a majority of the 902-928 band.

As Amateur’s, we are experimenters and have converted old (896-901/935-940) band equipment
to use in the 902-908 band. As much work was done to achieve this, it is not achievable if we
would be forced to use the middle of the 902-928 band.
